## Summary and suggestions

*Please insert at summary of the months information below and recommend any changes you would suggest to the tariff or proposition*

*FOR EXAMPLE:*

[Mobile number] is using over and above their UK data allowance; we would recommend you upping your data from x to x per month. This will cost you an additional x however you stand to save x.

[Mobile Number] has been abroad twice in two weeks, recommend Data abroad be switched on...list details.

[Mobile number] is making 08 calls and running up bills, internal conversation maybe needed to slow down usage...

Only One user has McAfee multi access on their device however we have had calls from users this week which hacked phones. Recommend additional licenses to be rolled out.
